HG 330-A: The powerful Weldy hot-air blower

The Weldy HG 330-A hot-air gun is a particularly powerful hot-air blower that is very easy to use. This convenient hot-air gun can be used for countless applications, such as car wrapping, for example. The working temperature can be adjusted in five-degree intervals between 80 °C and 650 °C. Thanks to digital temperature control, the set specification temperature is fixed and remains constant – regardless of the air quantity setting and the nozzle accessory used.

Hot-air blower

HG 330-A

- a high-performance, powerful hot-air blower
- digital temperature control for a consistent working temperature
- versatile and easy to use, with an ergonomic design
- five configurable memory locations for temperature and air stages
